DETAILED ACTION

Drawings

1. The drawings are objected to because:
 - a. Fig. 8, elements 61-63, examiner suggests inserting a label for clarification purposes.
 - b. Fig. 9, elements 35-37, examiner suggests inserting a label for clarification purposes.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Figures 2-7 should be designated by a legend such as **--Prior Art--** because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities:
- a. Pg. 2, lines 28-29, applicant make reference to "3". Examiner assumes Figure 3.
 - b. Pg. 3, line 7, applicant uses the phrase "probability to sample wrong". Examiner suggests "probability to sample the wrong" for clarification purposes.
 - c. Pg. 4, lines 21-22, examiner suggests applicant re-write these lines for clarification purposes.
 - d. Pg. 8, line 5, applicant uses the phrase "which register have the". Examiner suggests "which register has the" for clarification purposes.
 - e. Pg. 18, line 25-26, applicant uses the phrase "should be not less than". Examiner suggests using "should not be less than" for clarification purposes.
- Appropriate correction is required.

Art Unit: 2634

4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

5. Claim 10 is objected to because of the following informalities:

- a. Examiner suggests applicant spell out all variables in all equations.

Appropriate correction is required.

Conclusion

6. This application is in condition for allowance except for the following formal matters:

- a. Drawings
- b. Specification
- c. Claim Objections

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
